

Powerful cleaning
and quiet performance

Benefits of SMART Ducted Systems

Vacuuming your home is easy when you have a ducted vacuum system from SMART. It has all the features you need while being simple and comfortable to use. It's also convenient, efficient, and effective.

Powerful Suction

All dirt and debris your SMART ducted vacuum system comes into contact with, it removes.

Quiet Operation

In fact, it is ultra-quiet, so you can barely hear it at all. This is because the power unit is installed in a non-living area leaving only the sound of the airflow.

Lightweight

The hose is light making it easy to use and carry upstairs.

Convenient

You can have inlets wherever you need them, ensuring you can vacuum every part of your home.

Versatile

Clean anything and any surface with the 3-in-1 cleaning tool including crevices, fabrics, and more.

Long-Lasting Power

Unlike traditional vacuum cleaners, a SMART ducted vacuum system will not lose suction power over time.

Plug-In and Vacuum

With a SMART ducted vacuum system, your days of carrying around vacuum cleaners and tripping over cords are over. Instead, you simply plug in the lightweight hose to start vacuuming.

Cleaner Air

Unlike traditional vacuum cleaners, a SMART ducted system removes 100 percent of the dust and dirt it comes into contact with, leaving the air in your home cleaner. This is good for everyone, but it is particularly beneficial for those with allergies as well as asthma sufferers.

Optional HEPA Allergy Plus filtration

Allergy Plus filter (DECO range only) purifies the air to 99.97%, removing any impurities or allergens left after filtration, and then diffuses it through our soft air diffusion system.

Sleek Design

As well as delivering optimum performance, a SMART ducted vacuum system looks sleek and modern too.

SMART | The SMART Range

The SMART Deco range provides a choice of three power units to suit any size home. There are also two additional SMART Powerline models to suit smaller homes and apartments.

The list of features in the SMART Deco range is impressive. These include powerful yet quiet motors that have integrated silencers. Gore-Tex self-cleaning filters are standard on all models with the option to add a true HEPA washable filter, increasing the efficiency to 99.97% of all dust and debris collected. Three cleaning set packages to suit all budgets and requirements will ensure you have everything you need for effective home cleaning.
